Proud Member of the Microsoft Partner Network (MPN). A: For any questions about the development of the compilers (MSVC Compiler, Language Runtimes (MSIL/CIL), etc.), the Visual Studio Team System team should be the right people to contact. VSTA (Visual Studio Tools for Applications) is the Visual Studio product used to develop and build.NET extensions. C# (a language used to develop.NET extensions) VB.NET (a language used to develop.NET extensions) IMO, this is probably not the best use case for such a product. Q: How to backup APK from Nexus? I have a Nexus device and want to download the APKs created by apps from the store. I can see there is a /Downloads/Apps directory on the device. But my device is rooted and I cannot find which files belong to each app. They all seem to be one big file. How can I figure this out? Update: I got it working by using this command to get the list of apk files: adb shell ls /storage/emulated/legacy/Downloads/Apps | tr " " "\ " However, I am not sure how this can be used for an APK. I don't want to delete the APK that the user downloads from the store. A: If you have Root access, adb pull /system/app/ will do the work. echo "HelloWorld.apk" > ~/Desktop/test.apk adb pull /system/app/HelloWorld.apk If you don't have root access, you can find the apk in /sdcard/Downloads/Apps/ directory. ./adb shell ls /sdcard/Downloads/Apps | tr " " "\ " A: This command will list all APK files in the storage folder: adb shell ls /storage/emulated/legacy/Downloads/Apps You can delete them (or backup them!) manually, or get a list of them with: adb shell ls /storage/emulated/legacy/Downloads/Apps | grep -i '*.apk$' If you have root access, you could also use the command
