none I have the same problem. I am also unable to set my computer to Windows XP, Windows 7 or I bought a Samsung R528 laptop (model GT-N5100). I have Windows XP. I have a 500 GB hard drive. I need to install Windows 7. I tried to install Windows XP, Windows 7 or Windows 8 on it. But it doesn't work. This is what I did Set BIOS to boot from CD/DVD. It did not help. I also tried to set boot from hard drive. This doesn't work either. I tried different versions of Windows on different computers when I had Windows XP and Windows 7 on the same computer and it didn't work. I have used many tools. I have tried many different ways. When I already have Windows XP on my laptop, I can't install Windows 7. I have Windows XP installed, but I can't install Windows 7. What should I do now? I would really appreciate help in solving this problem.
