CrossTec SchoolVue X64

KEYMACRO is the leading company
for Keystroke Macro Recorders and
Keystroke Macro Software.

KEYMACRO software is developed by
experienced and skillful programmers
and provides user friendly interface.

KEYMACRO software is fully
compatible with all Windows operating
systems. KEYMACRO software
supports DOS and Windows operating

systems. Teachers and education practitioners who want to migrate their work into a digital environment will need to perform multiple tasks in order to create digital analogues of their classes and lessons. CrossTec SchoolVue was developed in order to provide users with a comprehensive solution for creating virtual classrooms, defining custom lessons, learning outcomes and inviting students to register to the newly designed courses. Cluttered interface that offers a variety of classroom management features and lesson design tools The application comes packed with a complex interface that provides users with a multitude of features that are

aimed at helping them define the preferred classroom characteristics. One will be able to create connections to other teacher / student machines, create custom student groups and add numerous details about the teacher, course contents, outcome or characteristics. Powerful account tools are available, allowing people to create multiple teacher profiles, switch between them with log-in / log-off controls and assign different classes to each one. The student list can be easily refreshed and teachers will be able to send invitations to the selected students, for registering in the provided courses. Create and maintain a virtual classroom learning

environment, with this feature-packed application One will be able to define a plethora of aspects and characteristics for the managed classes, ranging from student journals, file transfer, slideshows of media content to custom web access permissions. Furthermore, an internal chat client completes the bundle, allowing unhindered communication between the course participants and teachers. Remote access to students' PCs is also offered and teachers will be able to perform various tasks on students' desktops, this way increasing the learning efficiency. Several custom applications that teachers might be using can be set to appear in a quick-launch

menu, this way ensuring easy-access if circumstances require. Impressive virtual classroom management software, for those who require a reliable teaching environment People who need to create a virtual classroom, complete with courses, lessons, teacher details and student lists, might benefit from this application. It will allow them to manage multiple teacher accounts, add details about their courses, invite students to register for them or help them during the learning process. Featuring remote-desktop capabilities, the utility makes sure that teachers will have access to students' PCs 1d6a3396d6

Create virtual classes and manage students in an easy and effective manner Include student-based features to improve the education process Manage and track student's progress Set up student management and administration Track and manage student access permissions Includes more than 60 instructional design tools Includes chat and email features Includes remote desktop Includes student and teacher profile support Includes student registration feature Ability to set file sharing permissions Ability to manage file transfer permissions Includes many

other features that are ideal for teachers
Available for OS X (both Mac and
Windows) and iOS Learning
