Gorgeous graphics, great gameplay, roguelike in every way! You and a friend can go deep together, or play online with friends. You can also play in your pajamas, whilst sipping coffee out of a mud flaps, whilst mowing the lawn in your backyard, whichever suits you best. Convoy is a space-inspired, rogue-like, open world, twin-stick shooter, with plenty of weapons and vehicles that you can use to go, go, go, until you drop dead. It's about teamwork, understanding and calculating your next move. It's been said that you can have any dream, you can only have one, that's what I am going for! Features • Twin stick shooter – your team can be composed of 1-4 players • Open World - It's huge, and you can go anywhere! • Waves of enemies, try to avoid them, or destroy them. • Go deep into areas that are filled with scavenged weapons. • Dual-stick is all about nuance, strategy, and more.Share Article We're proud to announce the successful completion of Phase II of the St. Louis Small Business Development Centers (SBDC) program. Over the course of four years, the St. Louis SBDC has trained more than 200 small businesses and entrepreneurs and assisted them in creating more than $6 million in new revenue and assets. St. Louis, MO (PRWEB)May 25, 2014 The St. Louis SBDC announced today the successful completion of Phase II, the second phase of the St. Louis SBDC. The St. Louis SBDC is a part of the US Small Business Administration's Office of Service Delivery and Community Partnership, and is the only federal program in the nation to directly assist small businesses and entrepreneurs in the City of St. Louis. It is also one of only eleven nationally. "The St. Louis SBDC is pleased to announce the successful completion of Phase II," said Lynn Moody, the Director of the St. Louis SBDC. "While the small business economy continues to grow, the continued unemployment rate of 7.3% in St. Louis is an astounding number. The St. Louis SBDC has come together in response to the needs of small business and entrepreneurs. Over the course of four years, the St. Louis SBDC has trained more than 200 small businesses and

The war is heating up, and the alliance of the Twelve Colonies has been shattered by a resurgent Cylon threat. Rebel Cylon forces continue to pressure the remnants of the Alliance on both Caprica and Tauron, while the CIC crew of the Galactica struggle to maintain the fleet and protect the Colonies.Featuring two new Galactica modules, and four new sub-squadrons, Battlestar Galactica Deadlock: Resurrection recreates the classic 16-bit Galactica gameplay. The original Galactica's CIC crew features the iconic characters that brought the game to life, alongside their updated names and voices. Play through the fully narrated story of the war that led to the arrival of the Cylon Invader.Command the mighty Galactica as she fights the violent and destructive Third Cylon War. There are five planets to control in this Galactica campaign, each bringing a new set of challenges. Uncover the mysteries of the Quorum and discover the origins of Cylon infiltrators on Tauron.Explore the story through other space engagements. The Galactica can fight in space or in planetary orbit. Strap into your fighter and explore the vast new system of Cyrannus, all while piloting new starships such as the Vesta-class cruiser.Play through the intense and tactical dogfights you know and love. Fight both ground and aerial combat against the invading Cylons. Stick your nose into the fire from both sides. Fight your way through the frontline, and engage the Cylon threat on both the ground and in space.New Combat systemThe CIC crew of the Galactica consists of 16 unique characters. Each character has a unique skillset that, when used in synergy, can be devastating to the opponent.Tactic and build a strategy plan in order to fight the enemies in different situations. Customer Review Summary 4 (9 reviews) Nov 14, 2016 by Fe737 Amazing game!!! But, there are many bugs. Addition, the game doesnt feel good for a "Deadlock" sequel. It is a TACTICAL RTS. You have to manage your units, plan your defense, make good use of your troops. Focus mainly on doing damage to the enemy while NOT getting damaged yourself. You HAVE to watch for or control your jetpos' and ships. I loved how they updated a first class game. This is

What's new:

Portals takes online roleplaying games by surprise. It is a deep, dark place, buried under layers of complex game design, in which players are rewarded for predicting the consequences of their actions and thus thwarting the designs of their fellow players. It is a place where you must trust no-one and use any means at hand to outwit your peers and escape. It is the land of The Stygian Abyss, a place that seems to belong to another dimension, or another reality, wholly separate from the reality of our own. The Stygian Abyss was the true reality until the very moment that Jarca was born. The primal gates that existed in the world of undeath as a result of the Sundering split that moment in time and space, tearing through the world of our reality and into the Stygian Abyss. Were the forces of good able to close the gates, the world of our reality would be the same, but Jarca will never be born, and the world will remain in chaos for another thousand years. And so we live in the Stygian Abyss, and that is our world. Our world has opened onto the Abyss, granting us Dark Passages upon which we all ride, together. In The Stygian Abyss, there are tunnels and twists and passages, but very few things can be trusted. Always, there is a deeper mystery. Always, there is something further beneath that you can find and pursue. Always, you can find the hidden dangers that lurk beneath your feet or crouch behind pillars. Always, there is another way, open to that which lies just out of your sight in the depths of the Abyss. A custom map made for the game called Cultch appears to have been spotted by Kumpaarle on the internet. It seems likely that the GM sees people on his forums using the graphical pack from World of Underworld, created by Biochem Space Girl, and that there is some sort of misunderstanding that leads people to believe there is a map attached to the graphical pack that should be applied to the custom map. Kumpaarle, who believes that this custom map appears to be published by the author, said: Not saying this is the custom world map but I think it is the visual userguide update for cultch. too bad [EDIT: I think my initial guess is correct, Sreten Hristov] there is no download as far as I see. However, if you check the screenshot

(Kevin Lamarque/Reuters) Trump administration officials are trying to understand why the stock market can't get out of a prolonged sell-off. Confused? That's what is happening right now, not just within the Trump administration and the Federal Reserve but also among academics, investors, and everybody else who is trying to understand what is happening. The problem is that the fundamentals of our economy are rapidly shifting. We are on the brink of full employment, with unemployment at about 4.2 percent. Workers are more productive than ever, and worker compensation is finally increasing in many sectors. Meanwhile, corporate profits are at a record high. But what is happening now is that the degree of mismatch between supply and demand is extreme, a long-term move from one extreme to another. The unusual is happening. The unusual is happening because unemployment is almost a decade below historical averages and the economy is now rapidly expanding. The unusual is happening because while it's true that we continue to have too few workers, we do not have a problem with too many workers. We have a problem with too many good workers. A 2017 study by economist Robert H. Gordon suggests that it's possible to have a "superstar economy," but it takes time to overcome previous conditions. In our current economy, we no
