The AutoCAD 2007 release adds the ability to save/load the AutoLISP.LSP source files, and to load the AutoLISP files into AutoLISP or Visual LISP code. Use of AutoCAD scripts Some examples of AutoCAD scripts are: P.L.U.P. P.L.U.P. (originally known as Plat.L.U.P. or Platform L.U.P.) is the name given to a class of AutoCAD scripts that provide information about the structure, objects, or other data in a drawing. P.L.U.P. scripts are compiled with a lsp compiler and are self-contained. A PLUP is included with AutoCAD to display the "architectural or structural" or "detail" views of drawings in 2D and 3D, with each view showing the topological relationships of objects in the drawing. P.L.U.P. scripts typically are implemented using AutoLISP, or Visual LISP, or MEL scripts in Windows, and the variables in a PLUP script can be used in other AutoCAD Windows programs. Example To use a P.L.U.P. script in AutoCAD, open the Scripts Windows dialog box, click on Scripts to open the Scripts dialog box, and enter the name of the P.L.U.P. script (in the
