This section is written by Ian Schooling and includes a brief history, the four types of tests, and worksheets. The test for children covers the areas of hearing and vocal communication, sight, language, movement, thinking, intelligence, and learning in social settings. The test for adults covers the same areas as the test for children and goes beyond. This test has two editions; the original edition of 1969 and the revised edition of 1983. Of particular importance is that the 1963 version of the test applied to adults is no longer available. We suggest that new college professors should be required to complete the SLSI and be accountable for their learning styles and preferences with respect to teaching and professional development. Also known as career test, occupational interest test or occupational preference test. An assessment of the interest or aptitude a person has in a particular career or type of work. It is also known as occupational preference test, occupational interest test, occupational interest test, occupational interest test and career preference test. The test is used in vocational guidance to determine the preferred occupation, school or career of an individual. It is also used in career counseling to indicate which careers are of interest to an individual. It is useful for assessing the occupational interests of children and adolescents, the skills of older workers and for evaluating occupations, 49 recreations, 36 school subjects, 48 activities and 47 peculiar interests. As such it is useful for both educational and vocational guidance. 5ec8ef588b
