marked with @Order(0) doesn't throw the expected

exception I'm implementing custom HandlerInterceptor using @ExceptionHandler. I noticed that it is marked with @Order(0). So, it means that this interceptor will be invoked after method interceptor is invoked. But, if my interceptor throw new NotAllowedHttpException(), it is no thrown after method interceptor. It is still throws my custom exception, because it is not allowed in this method. Is @Order(0) only applicable in @ControllerAdvice classes?

```
@Component public class MyInterceptor implements HandlerInterceptor {
    @Override public boolean preHandle(HttpServletRequest request,
    HttpServletResponse response, Object handler) {
        throw new RuntimeException(); } }
@ControllerAdvice public class MyExceptionHandler {
    @ExceptionHandler(RuntimeException.class)
    @ResponseBody @ResponseStatus(HttpStatus.FORBIDDEN)
    public String handle(RuntimeException exception) { return
    "This is forbidden"; }
```
